YOGITA PATIL

Full Stack Developer | Python | React | JavaScript | Node.js | Express.js | MySQL | AWS
+91 8329450591 | patilyogita0303@gmail.com | Kolhapur, India
Portfolio | LinkedIn | GitHub

PROFILE SUMMARY

B.Tech Computer Science graduate (**2026, CGPA 8.40**) with hands-on full-stack development experience through production-deployed projects using **JavaScript (ES6+)**, **Python (FastAPI), React, Node.js, Express.js, MongoDB**, and **MySQL**. Skilled in designing RESTful APIs, background services and schedulers, JWT-based role-based access control, and normalized relational database schemas. Experienced in deploying applications on **AWS** (EC2, S3, CloudFront, RDS) using PM2 and Nginx and **Git/GitHub** workflows, with a proven record of taking features from concept to production with full ownership. Proficient in leveraging AI-assisted development tools such as **Claude** to accelerate development and improve code quality, while reviewing, testing and taking full accountability for all code I ship, with a strong foundation in **OOP** and **DBMS**.

EDUCATION

B.Tech in Computer Science Engineering — Sandip University, Nashik — Passing Year: 2026 | CGPA: 8.40
Higher Secondary (12th) — The New College, Kolhapur (MSBSHSE) — Percentage: 71.30%
Secondary (10th) — Murgud Vidyalay, Murgud (MSBSHSE) — Percentage: 93.80%

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML5, CSS3, SQL
Frontend: React
Backend: Node.js, Express.js, FastAPI, Socket.io
Database: MongoDB, MySQL / RDBMS, Sequelize ORM
Cloud & Deployment: AWS EC2, S3, RDS, CloudFront, PM2, Nginx, IAM
Tools: REST API, Git, GitHub, Postman
Core Concepts: Data Structures & Algorithms, Operating Systems, OOP, DBMS
Soft Skills: Problem-solving, Adaptability, Critical thinking, Communication

PROJECTS

KisanKart — Multi-Vendor Farmer Marketplace | Live Demo | GitHub Repository

- Developed a full-stack multi-vendor marketplace with Customer, Farmer, Delivery, and Admin modules using role-based JWT authentication and MVC architecture.
- Built 30+ RESTful APIs for product management, cart, wishlist, address management, checkout, and order processing with Sequelize ORM and MySQL.
- Designed a normalized relational database with secure authentication, authorization, validation, and centralized error handling, and developed responsive dashboards for different user roles enabling product management and order tracking.
- Implemented real-time chat between customers and farmers using Socket.io and integrated Razorpay payment gateway for secure online order checkout and payment processing.
- Deployed on AWS by hosting the frontend on S3 with CloudFront, the Node.js backend on EC2 with PM2, and connecting it to AWS RDS MySQL for a production-ready cloud architecture.

Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, Socket.io, Sequelize ORM, MySQL, Razorpay, AWS S3, AWS RDS, EC2

UptimeWatch: Website Uptime Monitoring Service | Live Demo | GitHub Repository

- Built a full-stack uptime monitoring platform with a FastAPI (Python) backend and React dashboard to track website status, response time and 24-hour uptime.
- Implemented a background scheduler (APScheduler) that checks due monitors every 15 seconds in parallel using a thread pool, with a 2-consecutive-failure rule to avoid false alerts and one alert per status change.
- Secured with JWT authentication, bcrypt hashing and SSRF protection; built REST APIs, a grouped SQL query for uptime %, and a daily cron job to purge old data.

Tech Stack: Python, FastAPI, React, SQLite, APScheduler, JWT, bcrypt, REST APIs

Salon Booking System | Live Demo | GitHub Repository

- Developed a full-stack salon appointment platform with JWT-based authentication, appointment scheduling, staff and service management, automated email reminders (Cron Jobs), and role-based admin features.
- Designed RESTful APIs for booking, rescheduling, cancellations, reviews, Razorpay online payment integration, and admin appointment management using Express.js, Sequelize ORM, and MySQL.
- Deployed on AWS (S3 + CloudFront frontend, EC2 + PM2 backend, RDS MySQL).

Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, Sequelize ORM, MySQL, JWT, AWS S3, AWS RDS, EC2

INTERNSHIP

Python Notes Intern, Jainemo Pvt. Ltd. | 1 Month | View Certificate

- Prepared structured Python notes covering core concepts.
- Strengthened programming fundamentals and documentation skills through writing clear, beginner-friendly technical notes.

ACHIEVEMENTS & CERTIFICATES

- Actively solving Data Structures & Algorithms problems on LeetCode — 100+ problems solved and earned August 2026 LeetCoding challenge badge. (View LeetCode Badge)
- National Means-cum-Merit Scholarship (NMMS) Scholar, awarded by the Government of India for academic excellence.
- Data Structures & Algorithms — Apna College (View Certificate)
- Web Development Training — Internshala (View Certificate)
