EDUCATION

• Sandip University, Nashik

B.Tech in Computer Science

CGPA: 8.40

• The New College - Senior Secondary

MSBSHSE - Maharashtra State Board

Percentage: 71.30

• Murgud Vidyalay Murgud

MSBSHSE - Maharashtra State Board

Percentage: 93.80

TECHNICAL SKILLS AND INTERESTS

Languages: Javascript, HTML5, CSS3, SQL, Typescript

Backend: Node.js, Express.js

Database: MongoDB, Relational Database (RDBMS)- SQL/MySQL, Sequelize ORM

Tools: REST API, Git, Github, Postman, AWS

Core subjects: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System

Soft Skills: Problem-solving, Adaptability, Critical thinking

PROJECTS

• KisanKart

Multi-Vendor Farmer Marketplace-github repository 

- Developed a full-stack multi-vendor marketplace with Customer, Farmer, Delivery, and Admin modules using role-based JWT authentication and MVC architecture.
- Built 30+ RESTful APIs for product management, cart, wishlist, address management, checkout, and order processing with Sequelize ORM and MySQL.
- Designed a normalized relational database and implemented secure authentication, authorization, validation, and centralized error handling for scalable backend development.
- Developed responsive dashboards for different user roles, enabling product management, order tracking, and marketplace administration
- Deployed KisanKart on AWS by hosting the frontend using AWS S3 with CloudFront, deploying the Node.js backend on EC2 with PM2, and connecting it to AWS RDS MySQL for a production-ready cloud architecture.
- Technology Used: HTML, CSS, JavaScript, Node.js, Express.js, Sequelize ORM, MySQL, AWS S3, AWS RDS, EC2

• Salon Booking System

github repository 

- Developed a full-stack salon appointment platform with JWT-based authentication, appointment scheduling, staff and service management, automated email reminders (Cron Jobs), and role-based admin features.
- Designed RESTful APIs for booking, rescheduling, cancellations, reviews, online payment integration, and admin appointment management using Express.js, Sequelize ORM, and MySQL.
- Technology Used: HTML, CSS, JavaScript, Node.js, Express.js, Sequelize ORM, MySQL, JWT

• Group chat Application

github repository 

- Built a real-time group chat application enabling instant messaging between multiple users using Socket.IO and WebSockets.
- Implemented secure user authentication, message broadcasting, and persistent chat data storage using Node.js and MySQL.
- Technology Used: HTML, CSS, JavaScript, Node.js, Express.js, Socket.IO, MySQL

ACHIEVEMENTS

- Solved 300+ Data Structures Algorithms problems across multiple coding platforms.
- National Means-cum-Merit Scholarship (NMMS) Scholar awarded by the Government of India for academic excellence (Class 8).

CERTIFICATES

- *Data Structures Algorithms – Apna College* 
- *Web Development Training – Internshala*
